DETAILED ACTION

Allowable Subject Matter

Claims 3, 6, 8, and 11 are allowed.

The following is an examiner's statement of reasons for allowance:

As stated in the Office action sent on 8/6/03, the prior art fails to disclose an electronic device having a light guide as proposed providing light to a display area. In particular, the prior art fails to disclose the light guide as having a liquid crystal light guiding medium with a light emitting surface and a side face around the emitting surface in which the output ends of light pipes are arranged along the side faces as proposed.

U.S. Patent No. 5,099,343 to Margerum et al. discloses a display having a display area with a planar liquid crystal light guiding medium as proposed, however, fails to disclose a plurality of light pipes with output ends arranged along the side faces of the liquid crystal light guiding medium. Instead, Margerum discloses diffusers (Figure 1 elements 46 and 48) as a means of introducing collected light into the guiding medium.

U.S. Patent No. 4,989,933 to Duguay discloses a plurality of light pipes (Figure 11 element 122) along a side face of a light guide resonator, however, no there is no suggestion in the prior art to arrange the light pipes along the side face of a liquid crystal light guiding medium as proposed by Applicant.

U.S. Patent No. 5,016,956 to Gasparaitis et al. discloses a mat of woven light pipes arranged to provide a backlight for a liquid crystal display (Figure 1B). There is no suggestion in the reference to arrange the light pipes along the side of a liquid crystal light guiding medium.
